DUO-IP/LTE Communicator

Direct Dual-Path Alarm Communicator. No Clearing House.

Interactive App Included. No Monthly Fees.

IP and LTE options available on-board.

Home Automation Compatible.

Professional Dual-Path Communicator with Interactive Services
The DUO-IP/LTE is a powerful TCP-IP based bus-level interface to DSC PowerSeries panels and Honeywell Vista panels. In addition to IP alarm communications with your central monitoring station, it allows your customers to view the status of and control their alarm panel through a standard web-browser or smart-phone.

About the Connect2Go Service
Our free interactive service offers your customer the following:
• Remote Arm/Disarm/Zone Bypass/PGM Control
• Event Logging
• Alerting by e-mail, SMS or push notification. Up to 30 different contacts.
• Network Supervision
• Ability to label Zones, Users, and Partitions for ease of reporting
• The proprietary "Zone Map" feature provides system occupancy at a single glance
• iPhone and Android app available
• Multi-language portal support

Support for Home Automation
The built-in TPI (third party interface) allows for compatibility with many major home automation systems including Amazon Alexa and Google Home.

Central Station Monitoring With No Third-Party Clearing-House Required
Unlike other providers who sit in the middle between you and your customers, the EnvisaLink communicates directly to your central station. You do not need a separate account as the EnvisaLink uses the same account information for IP and LTE (optional), guaranteeing true redundancy.

Features
• 100BaseT Ethernet support
• LTE CAT-M1 & NB-IoT
• GSM 4G
• Improved diagnostics LEDs to speed installation.
• Remotely upgradeable for new featues and services.
• 4 modes of operation available.
• Supports up to 8 partitions.
• Encrypted communications.
• Horizontal or Vertical mount.
• LTE antenna may be extended from the panel by 10m (30 feet) with optional coax cable.
• Comptible with Amazon Alexa, Google Home (and many other smart-home platforms)

Specifications
• Power Draw: 65 mA
• Connectors: RJ45, 4-Terminal Screwdown
• Dimensions: 10.5 x 4.2 cm (4-3/16 x 1-11/16 inches)

Included In The Box
• DUO-IP/LTE (SIM card included, subscription required)
• Antenna, Hardware Kit, and Manual

Panel Compatibility
• DSC PowerSeries (1555, 1555MX, 1575, 5010 (832), 5020 (864), 1616, 1832, 1864)
• Honeywell Vista Panels (Vista20P, 21iP, 15P, 10P, 128P, 250P)
• If the system is not compatible or too old, a universal mode is available that can work with most systems. Otherwise consider upgrading it to our new UNO IP
